SUBSURFACE PROFILE				SAMPLE			Organic Vapour Rdg.					Well Completion Details	
Depth (m)	Symbol	Description	Elev. (m)	Number	Type	Recovery	PPM						
							100	300	500	700	900		
0		Ground Surface											
0-3		SAND AND GRAVEL Silty, very firm, light brown, grey, dry, no odours/staining											
3-4		2.3 m: Mild Hydrocarbon odour		3-1	G								
4-7													
7-8		SILTY FINE SAND Trace clay, firm, grey, light brown, dry, mild Hydrocarbon odour		3-2	G								
8-10				3-3*	G								
10-12		3-3.8 m: Moist, stronger hydrocarbon odour											
12-13				3-4*	G							4000	
13-15		CLAYEY SILT Medium plasticity, soft, light brown, grey, moist, Hydrocarbon odour		3-5	G							1100	
15-17													
17-18		SILTY SAND Very firm, soft, light brown, grey, moist, Hydrocarbon odour (bands of sand and clay)		3-6*	G							750	
18-20													
20-23		CLAYEY SILT Medium plasticity, soft, light grey, moist to wet at bottom, slight Hydrocarbon odour											
23-24		End of Borehole * Submitted for analysis 3-4 with 09-DUP-2											

Drilled By: [REDACTED]

Hole Dia: 6"

Well Dia: 2"

Drill Method: Solid Stem Auger

Grnd Elev: NA

TOC Elev: 693.42m

Drill Date: 09/01/26

Sheet: 1 of 1
